Jérémy THONON

Front-end developer

As a passionate front-end developer, I create robust and sustainable solutions with a keen eye for detail and the ability to adapt. I'm looking to develop my back-end skills while continuing to learn on the front-end side, with the ambition of becoming full-stack. Motivated and ambitious, I'm enthusiastic about contributing to a dynamic company in Switzerland and I'm ready to move quickly to seize this opportunity.

PROFESSIONAL EXPERIENCES

Front-End Developer (permanent contract)
Decathlon Belgium

Since 02/2023

🔧 Technical development :

- Use of Svelte.js, Tailwind CSS and Decathlon's in-house design system to develop responsive and consistent user interfaces
- Implementation of unit tests with Jest to guarantee the reliability of the front-end code
- Route management with Express/Node.js to ensure a robust back-end architecture
- Integration and management of an internal CMS based on Strapi to facilitate content management and component structure

🔄 Agile methodology :

- Participation in bi-weekly meetings to plan sprints and daily stand-up meetings to share daily stand-up meetings to share progress and resolve problems
- Weekly rotation of the 'Dev of the Week' who is responsible for production start-up and emergency management

Site and Logistics Manager (permanent contract)
Agrifirm - Agri-Activ

09/2016 - 12/2022

🚚 Logistic :

- Transport planning, including deliveries to customers, orders to suppliers, loading of barges for overseas destinations and collection of cereals from the field during harvest
- Warehouse stock management
- Logistics incident management
- Quality control of incoming goods (fertilisers, cereals, animal feed, plant protection products)

🏢 Warehouse management :

- Planning and distribution of tasks between the various teams on site
- Management of staff rotation according to holidays, which is particularly important and difficult during the harvest period, requiring a potential presence on site day and night
- Customer service and order processing
- Maintenance of handling vehicles
- Manufacture of various bulk mixes to order (fertilisers, animal feed) in accordance with GMP standards
- Maintaining the cleanliness and organisation of the storage site in accordance with GMP standards
